PROFESSIONAL AIMS

I would like to apply the knowledge that I acquired during my studies in Computer Science. I would develop projects to test and increase my skills. I am very interested in the Software Developing, especially in Web Applications. I do believe that the relationship between users and software is founded on usable interfaces. For this reason, I'm concern about the Front End side. I would find stimulating to share knowledge and experiences with others people.

WORK EXPERIENCE

From 09/2017 to 02/2018

University Internship
At IFM-Group - ifmgroup.it

▪ Developed Front-End Dashboard Application in Angular 5 framework
